

Don't put plastic bags and “compostable” plastic bags in the bin for organic waste!

- The new Biowaste Ordinance will apply from **1 May 2025**.
- **No contaminants** should be placed in the bin for organic waste.
- **Contaminants:** metal, metal, glass, ceramics, textiles, plastic bags
- “Compostable” plastic bags are unsuitable for organic waste.
- They **take too long to compost** and **interfere** with the **recycling process**.

Alternatives for the disposal of organic waste:

Wrap it in
newspaper

Dispose it in
paper bags

Put it in the
bin loosely
